ASSEMBLY INSTRUCTIONS

1. Ensure the surface is clean.
2. Screw the Anti theft device onto the filler neck - like a bayonet cap.
PLEASE NOTE: $\frac{1}{4}$ of a turn is enough for the optimal fixing position.
It is not possible to screw the safety lock B80 Atego - so find the right position (holes in the middle of the sealing surface) in advance to put on.
3. Inside the anti theft device you will find 2 pre-drilled holes for fixing. Mark the position of the 2 holes onto the filler neck for drilling.
4. Unscrew and remove the Anti theft device.
5. Drill 2 wholes into the provided seal (hole positions to be adopted from the safety lock) and put on the seal plain into the bottom side of the anti theft device, between the bearing surface with 2 pre-drilled holes and the 2 bayonet locking bolts (the holes must line up with one another).
6. Drill out the 2 marked holes on the filler neck using the provided or an adequate 4.2mm drill bit, taking care that none of the drilled material falls into the tank.
7. Screw on the anti theft device until the 2 holes line up with one another and fix in place using the 2 provided rivets with the tail end of the rivet uppermost. Attach the spacer using the rivet gun to rivet the anti theft device to the filler neck taking care that the tail of the rivet does not fall into the tank.
8. Screw on the original filler cap again

We accept no liability for damage resulting from incorrect installation.
We recommend that installation be carried out by a qualified garage.
Drilling residue etc. remaining in the tank can lead to the destruction of the pump and or filter.
